S.S.S. AUTOMATIC WATER ROBOT

"IT PROPERLY APPLIES WATER BETTER THAN BY HAND" . . . "SAVES MONEY"
. . . "SAVES WATERING TIME" . . . "RELEASES A MAN TO DO OTHER WORK"

THE S.S.S. AUTOMATIC WATER ROBOT HAS EVERYTHING REQUIRED TO SATISFY EVERY RANGE'S WATERING NEEDS!

1—AUTOMATIC SHUTOFF

Saves you time and labor. The Water Robot waters better than manual watering and automatically shuts off at the machine when two benches or beds have been watered as you directed. All done with a 1/3 H.P. electric motor.

2—AUTOMATIC SHUT OFF ALARM

The S.S.S. Automatic Water Robot delivers as much or as little liquid as you require. Water or liquid fertilizer passes freely with no constriction of pressure or volume. The convenient shut off alarm tells you when the job is done.

3—AUTOMATIC LEVEL HOSE WINDER

It is not necessary to have the reel aligned perfectly with the bench or walk because the Automatic Level Hose Winder prevents the hose from tangling or piling up on the reel.

4—MICRO-SWITCH CONTROLS

Guards against spot flooding. Especially when it encounters an overload, the Robot automatically stops winding . . . automatically shuts itself off.

5—VARIABLE SPEED DRIVE

Speed of winding can be adjusted from 2 to 3 feet per minute.

6—RUBBER-TIRED WHEELS

Makes it easy for one man to move.

7—ADJUSTABLE RISER

The telescope-like riser on the watering sled allows quick and easy adjusting of the nozzles at the required height.

8—COMPACTNESS

Maximum width of Water Robot is only 24 in. with a 125 ft. reel. Only 28 in. wide with a 200 ft. reel. Easily passes through practically any door or end aisle. Turns completely around in its own 36 in. length.

S.S.S. AUTOMATIC WATER ROBOT

The S.S.S. AUTOMATIC WATER ROBOT is fully guaranteed to do the job as specified. In addition, every Robot is guaranteed for one full year against all mechanical failures.

JOHN F. MICHEL

Oct. 3, 1956

Dear Mr. Skidell:
Our Robot has been working every day, all day ever since it arrived. It takes no time out to lunch and is a willing and efficient worker after all the live help have quit for the day. The Robot has proven a good investment and does a fine job.
Before it arrived we were always short handed. I don't know what we would do now, without it.
Very truly yours,
Ed. Michel

PEAT POTS

To establish young plants when tight schedules do not permit direct benching, use nutrient treated Peat Pots. These pots are molded from 75 per cent Peat and 25 per cent wood pulp, and contain 1.3 per cent Nitrogen, 1 per cent Phosphoric Acid and 1.6 per cent Potash. They are weed and disease free.

Plants grow faster and make more vigorous and rapid growth than plants grown in other types of containers. Nutrient treated Peat Pots dry out slower than clay pots, therefore require less frequent watering. Because the roots penetrate the wall of the nutrient treated Peat Pot, there is no knocking out, thereby saving time and labor.
